

Escape-Carry Chair XS

Evacuation ascending the stairs, while in a seated position.

What's an Escape-Carry Chair?

An **Escape-Carry Chair** is the solution to evacuate people to safety in a seated position up and/or down a flight of stairs. A simple procedure can make the **Escape-Chair** ready within a few seconds.

How does an Escape-Carry Chair work?

The unique glide and brake system makes the use of the **Escape-Carry Chair** possible on all different kinds of stairs, from wood to concrete. The braking system is optimized by the weight of the evacuee, in combination with the pressure of the operator pushing down on the handle in the direction of the stairs.

Ascending evacuation should always be operated by at least 2 people. Ensure to make use of the support braces.

Advantages of the Escape-Carry Chair XS:

- Used for ascending and/or descending evacuation on the stairs.
- Ideal for quick evacuation.
- Descending evacuation can be operated by one person.
- Speed of descent to be determined by the user.
- Ready to use within seconds.
- Can easily manoeuvre into the evacuation flow.
- Forms minimal blockage on the stairs.
- Equipped with carrying handles.
- Fits into your emergency plan.
- Safe closed gliding belt cassette.
- CE, TÜV & ISO 13485 certified.
